

**Brooks McCall PowerPoint Bullets for 6/25/2010**  
**Operational Period: 6/24/2010 Sampling Period**

- The day's sampling strategy was to try and locate the plume and follow it to its outer margins.
- A total of 4 CTD casts were completed at stations BM103, BM104, BM105 and BM106.
- The CTD array data showed fluorescence signals at stations BM103, BM104 and BM106. No significant fluorescence signals at Station BM105.
- No decreases in dissolved oxygen were observed.
- A total of 63 LISST samples were analyzed, including duplicates.
